EDUCATION

Web Developer

VIVIXX Bootcamp

2022-2023

I completed the Vivixx bootcamp, acquiring intensive training and hands-on experience in creating dynamic websites.

PROFILE

I am a skilled and passionate WordPress developer with a proven track record of creating visually stunning and highly functional websites. With 1 year of experience in the field, I specialize in crafting custom WordPress sites that cater to the unique needs of businesses and individuals.

WORK EXPERIENCE

Web Developer

Sweet Mom March 2023- May 2023

- Developed a bespoke WordPress website for a bakery shop, focusing on creating a visually appealing design that reflects the brand's identity. Implemented custom color schemes, typography, and graphics to evoke a warm and inviting atmosphere, resonating with the bakery's target audience.
- Created a dynamic menu section on the website to showcase the bakery's menu items, including cakes, pastries, bread, and beverages. Implemented filtering options, search functionality, and customizable order forms to accommodate special requests and preferences, enhancing customer convenience.
- Implemented an efficient online ordering system that allows customers to customize their orders, select pickup or delivery options, and schedule order pickups based on availability. Integrated notification systems to alert customers about order status updates, ensuring timely and accurate deliveries.
- Developed a mobile-friendly WordPress website for the bakery shop, optimizing layout and functionality for seamless viewing and interaction on various devices.

Web Developer

Very Good Strategies June 2023 - 2024

- Created a versatile catalog system on WordPress, making it easy for visitors to explore various product/service categories.
- Designed visually engaging pages with images and descriptions to showcase product/service varieties effectively.
- Integrated customization features for users to personalize selections within each variety, enhancing user experience.
- Implemented efficient search and filtering tools for quick access to specific varieties based on user preferences.
- Ensured fast loading and smooth performance of the website, even with a large variety of products/services, improving user satisfaction.
- Incorporated interactive elements such as sliders, galleries, and interactive maps to engage users and showcase product/service varieties dynamically.
- Developed a mobile-friendly WordPress website, optimizing layout and functionality for seamless viewing and interaction on various devices.
- Leveraged JavaScript and CSS for advanced customization, including interactive animations, custom styling, and dynamic content loading, enhancing the visual appeal and functionality of product/service variety pages.
